

SUSTAINABILITY: From Intent to Action

REDUCE CO₂ FOOTPRINT
WITHOUT INCREASING COSTS

80%

of a product's **early design** determines its **environmental impact**

<2°C

The maximum
agreed increase in
Global Warming

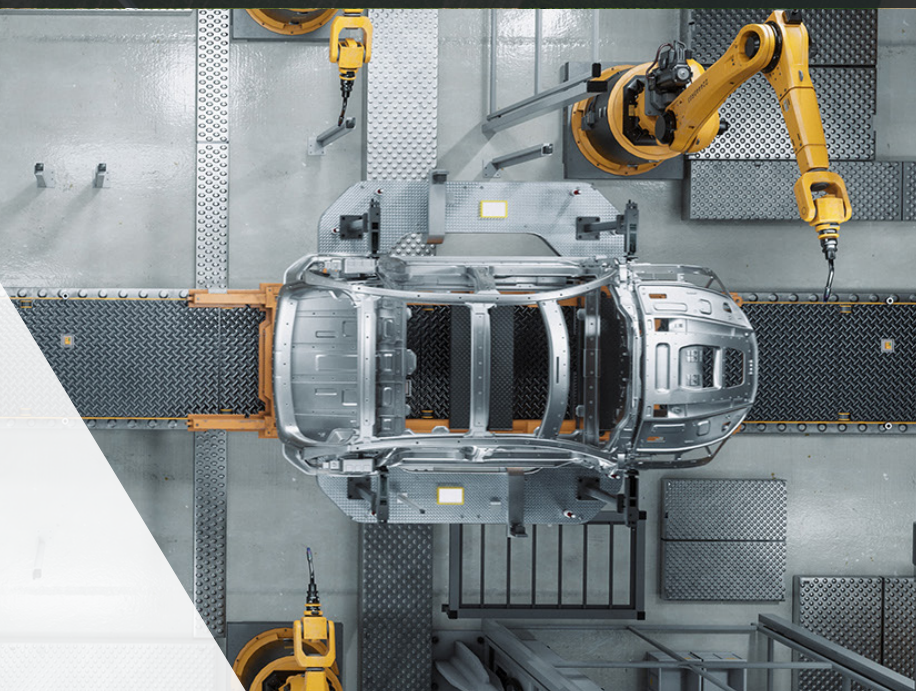

23%

of **Greenhouse Gases**
come from Industrial
Emissions

54%

of the world's energy
consumption **is from
manufacturing**¹

With aPriori you can...

Evaluate different manufacturing processes comparing
CO₂ and Cost

Find alternative materials with lower CO₂ with full visibility
into cost impact

Measure the reduction in CO₂ by increasing the use of
recycled or secondary materials

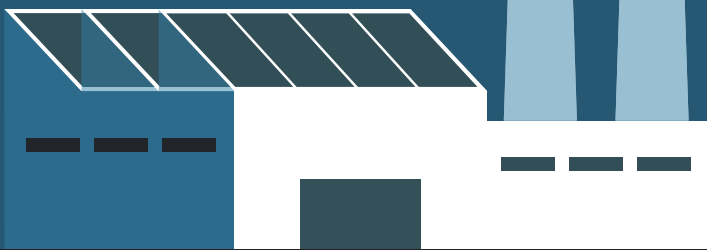

Compare environmental impact from manufacturing in
alternate regions around the world

Global CO₂ Emissions Goals

How Will You Reduce Your CO₂ Emissions? aPriori Can Help.

50%

BY 2030

NET ZERO

BY 2050

66% of consumers
prefer sustainably
responsible companies¹

99% of CXOs say
environmental programs
drive shareholder value²

Explore 3-5 times more CO₂ saving
alternatives in minutes, via design,
manufacturing and sourcing.
